## Examples for usage

---

Top results, as shown here with the MKS 165 Ec, can only be achieved with original MAFELL tools.

The cutting depth can be adjusted easily via a precise handwheel.

The tilt range of 0° – 60° enables extreme bevel cuts.

The constant cut display.

## Applications

---

- ▶ Cross-cutting and rip cuts
- ▶ Bevel cuts up to 60°
- ▶ General joining work
- ▶ Compatible materials include solid wood, laminated beams, insulating materials

## Advantages

---

- ▶ Continuously variable speed control for individual requirements and applications.
- ▶ Lower saw guard with remote control - for easy release of the saw blade, e.g. when positioning at sharp angles.
- ▶ Constant cut display for 0° - 60° - due to exact centre of rotation, which is on the underside of the base plate.
- ▶ With tool brake - for optimum operator safety and work processes.

## Description

---

Carpenter's portable circular saws with extraordinary weight/performance ratio. Only possible due to the use of ultra-modern die-cast magnesium alloys.

Tilt through 60° makes the portable circular saws a universal partner.

An easy-to-read scale on the cutting depth adjustment makes work easier and saves tiresome re-measurement.

The saw's handling and behavior are refined by smooth starting, constant speeds under load, speed reduction and overload protection.

The easy-to-use stop system of the MKS and the adjustable hose connector make your work much easier.
